NONCITRUS PRODUCTION UP 3 PERCENT

United States fruit growers harvested 11.4 million tons of deciduous fruit in 1977 up 3 percent from the previous year but 1 percent below 1975. The greatest tonnage decreases were shown in pears, olives and sweet cherries. The largest tonnage increases were shown in grapes, apples, peaches, prunes and plums.

Value of utilized production at 2.2 billion dollars for 19 deciduous fruits increased 10 percent from 1976. Grapes, apples, and peaches led the increase in value while olives, cranberries and sweet cherries showed the largest decline.

PRODUCTION OF EDIBLE NUTS UP, VALUE UP

Total edible nut production at 598 thousand tons increased 23 percent from 1976 and was 19 percent above 1975. Increases in production were shown in all nut crops.

Utilized value of production for 5 edible tree nuts at 575 million dollars was 44 percent above 1976 and 79 percent more than 1975.

UTILIZED PRODUCTION AND VALUE OF NONCITRUS FRUITS AND NUTS BY KINDS, UNITED STATES, 1975-77

1/ INCLUDES CULLS AND CANNERY DIVERSIONS FOR CALIFORNIA CLINGSTONE PEACHES (TONS): 1975-81,000; 1976-77,000; AND 1977-57,500.

2/ EXCLUDES CULLS AND CANNERY DIVERSIONS FOR CALIFORNIA CLINGSTONE PEACHES.

APPLES: The Nation's 1977 commercial apple crop totaled 6.7 billion pounds utilized, a 5 percent increase from last year but 6 percent below the 1975 figure. In the East, 2.7 billion pounds were utilized, 15 percent above a year earlier, and the Central States production rose 12 percent to 975.6 million pounds; both regions suffered from spring freeze damage to the 1976 crop. The Western States produced nearly 3.0 billion pounds, off 6 percent from 1976 and 2 percent less than in 1975. Washington's crop, the largest in the Nation, slipped 7 percent from a year ago to 2.1 billion pounds.

York Imperials made the largest gain from 1976 with 40 percent more produced. Other varieties showing large increases were: Northern Spy and R I Greening, each up 26 percent; McIntosh, 25 percent; Stayman 19 percent; Jonathan, 16 percent; and Cortland, up 15 percent. Delicious apples registered a 4 percent decline while Gravensteins, Rome Beauties, Winesaps, and Yellow Newtowns reflected 1 to 2 percent reductions.

Red Delicious remained the Nation's leading variety, at 34 percent of the total U S crop. Other leading varieties as a percent of total were: Golden Delicious, 18 percent; McIntosh, 10 percent; Rome Beauty, 7 percent; Jonathan, 5 percent; and York Imperial, 4 percent of total production.

APRICOTS: U.S. apricot production at 147,400 tons was 5 percent below the 1976 production and was 19 percent below the 1975 crop.

AVOCADOS: Production of California avocados in 1976-77 totaled 120,000 tons more than double the 1975-76 crop. Florida crop at 21,100 tons was 27 percent below the 1975-76 crop.

BANANAS: The Hawaiian crop is placed at 5.8 million pounds, 15 percent more than the 1976 crop but 6 percent less than 1975.

BUSHBERRIES: Washington and Oregon bushberry production totaled 58.9 million pounds, 2 percent more than was produced in 1976, but 9 percent below the 1975 crop. Cultivated Blackberry production totaled 19.4 million pounds, down 14 percent from 1976. Blueberry production in Washington at 4.4 million pounds was up 7 percent from 1976. The Boysenberry and Youngberry crops in Oregon at 3.2 million pounds were up 40 percent. Currant production in Washington, at 326,000 pounds, was down 30 percent. The Oregon Loganberry crop, at 3.6 million pounds, was up 44 percent over the 1976 production. Black Raspberry production in Washington and Oregon totaled 2.5 million pounds, 30 percent above the 1976 crop. The Red Raspberry crop in Washington and Oregon was 25.5 million pounds, 6 percent above the previous year, but 9 percent below the 1975 production.

SWEET CHERRIES: The Nation's 1977 sweet cherry output totaled 147,800 tons, of which 146,500 tons were utilized. This was 13 percent below the 1976 record utilized tonnage and 6 percent less than in 1975. Fresh consumption accounted for 49 percent of the utilized tonnage and the remaining 51 percent was sold for processing uses; this compared with 57 and 43 percent, respectively, a year ago. Production declines were registered in virtually every important producing State except Michigan, which rebounded from the freeze damaged short crop in 1976.

TART CHERRIES: Production of tart cherries in 1977 totaled 214.1 million pounds, all of which was utilized. This was 46 percent above the freeze damaged 1976 crop, but 13 percent below the 1975 figure. Of the total processed, 62.8 million pounds were canned, 139.3 million pounds were frozen, and the remainder of the crop was sold for other processing uses or for fresh market.

CRANBERRIES: The 1977 cranberry crop totaled 2.1 million barrels, 12 percent less than the record high 1976 crop but 3 percent more than in 1975. The area harvested, at 22,550 acres, was down slightly from 1976's 23,080 acres, and yield averaged 94.4 barrels per acre, off from the 104.3 barrels per acre a year ago. Output was down in every State except Washington; the largest producers, Massachusetts and Wisconsin, were off 5 percent and 13 percent, respectively.

DATES: The 1977 California crop totaled 25,100 tons, 12 percent above the 1976 crop and 1 percent above the 1975 crop.

FIGS: California fig production amounted to 38,500 tons in 1977, 20 percent above the 1976 production and 1 percent above 1975. There were 3,400 tons utilized as fresh or canned and 11,700 tons of dried figs which were made from 35,100 tons of fresh equivalent.

GRAPES: The 1977 utilized tonnage of grapes totaled 4.2 million tons, 4 percent above the 1976 level but 3 percent short of the tonnage of two seasons ago.

The California crop, at 3.9 million tons, rebounded from last year's rain damaged output but was still slightly less than the 1975 total. California's share of the U.S. total rose to 93 percent compared with about 90 percent in recent years. Production of wine varieties, at 1.6 million tons, was 19 percent above last season's figure, and table varieties were up 12 percent to 455,000 tons in 1977. Production of raisin varieties, at 1.9 million tons, was off 3 percent from a year ago and 13 percent below the 1975 crop. Many growers, fearing predicted rains, laid raisins early, resulting in low sugar content, high moisture, and a higher dry-away ratio.

Utilized production in the other States fell 24 percent from the 1976 level; New York was off 42 percent and Pennsylvania was down 49 percent due to poor harvesting weather.

NECTARINES: California production in 1977 totaled 150,000 tons, 17 percent above the previous year, and 35 percent above 1975.

OLIVES: Production in California totaled 43,000 tons, 46 percent less than was produced in 1976.

PAPAYAS: The 1977 production of Hawaiian papayas amounted to 61.5 million pounds, a record high for the sixth consecutive year. The papaya crop was 23 percent more than a year earlier and 54 percent above 1975.

PEACHES: The 1977 U.S. peach crop totaled nearly 3.0 billion pounds, of which 2.9 billion pounds was utilized. This was 8 percent higher than the utilized output of the previous two seasons. The California clingstone crop accounted for 1.4 billion pounds (49 percent) of the U.S. utilized production. This was 17 percent above the 1976 crop, which was hard hit by a mid-season cannery workers strike, and 9 percent more than the 1975 level.

Excluding California clingstones, peach production totaled 1.5 billion pounds utilized, up 1 percent from last season and 7 percent above the 1975 utilization. South Carolina's output rose 1 percent and New Jersey's jumped 47 percent above 1976, but in Georgia, the crop slipped 36 percent below a year ago.

PEARS: The Nation's 1977 pear production totaled 785,500 tons utilized, 5 percent less than the 1976 record, but 6 percent above the 1975 utilized tonnage. The three Pacific Coast States accounted for 738,600 tons (94 percent) of the U.S. crop, 7 percent under last season's utilized total. Bartlett production totaled 543,000 tons, compared with 567,000 tons in 1976, and output of pears other than Bartletts was set at 195,600 tons, compared with 1976's 228,500 tons.

PERSIMMONS: The 1977 California production at 2,000 tons, 9 percent less than last year but 29 percent more than the 1975 crop.

POMEGRANATES: Production totaled 9,500 tons in California, 6 percent more than last season and 10 percent more than 1975.

PRUNES AND PLUMS: There were 58,000 tons of prunes and plums utilized in Idaho, Michigan, Oregon, and Washington in 1977. This was 21 percent below the 1976 level and 19 percent less than in 1975. The sharp reduction in Washington and modest declines in Michigan and Oregon more than offset the Idaho increase.

In California, the plum crop, at 157,000 tons, was 37 percent above last season and 27 percent higher than in 1975. The California prune crop totaled 157,000 tons in 1977, up 6 percent from a year earlier and 5 percent above 1975.

ALMONDS: California production at 255,000 tons in shell was 9 percent more than was produced last year, and 59 percent above 1975.

FILBERTS: Production in Washington and Oregon totaled 11,600 tons. This was 62 percent above last season but was 4 percent below the 1975 crop.

MACADAMIA NUTS: The 1977 Hawaiian crop at 19.2 million pounds was 1 percent above the 1976 crop and 5 percent above 1975.

PECANS: The U.S. 1977 pecan crop is estimated at 249.5 million pounds, almost 2½ times the small 1976 production. Improved varieties at 146.0 million pounds accounted for 59 percent of the production compared to 75 percent in 1976. The native and seedling crop is placed at 103.5 million pounds, 4 times larger than the 1976 crop. The crops were near normal in all States except Texas where dry weather during the summer and insects took their toll.

WALNUTS: The 1976 walnut crop in California and Oregon totaled 195,550 tons, 6 percent more than last year but 2 percent below the record high set in 1975. California production at 195,000 tons was 7 percent above the 1976 production.

DEFINITION OF TERMS

Total Production - is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic reasons.

Utilized Production - is the amount sold plus the quantities used at home or held in storage.

Economic Abandonment - is the difference between total and utilized production which is mature fruit not harvested for economic reasons or excess cullage fruit.

Utilization - refers to first utilization, not necessarily final utilization. For example, frozen fruit included some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

Apples, Commercial Crop - Orchards of 100 or more bearing age trees.

Prices - is a season average for all methods of sale. For a crop sold for both fresh market and processing, the season average price is a weighted average of the fresh and processing price.

Prices for fresh fruit, except as noted below, are the average prices producers receive at the point of first sale. This is commonly referred to as the average price as sold. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit is sold f.o.b. packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands, the fresh fruit average price as sold is a weighted average of the average price for each method of sale.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door.

Exceptions to the above definitions are:

(1) Fresh fruit sales in Washington and Oregon are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices. F.o.b. packed prices are adjusted down to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the f.o.b. price. These costs include grading, packing, inspecting fees, selling, and other costs.

(2) Fresh prices shown for California represent returns at the first delivery point by the producer. The first delivery point price is defined as the price received by growers for fruit delivered at the local market, packinghouse, receiving shed, or any other first delivery point.

Value estimates in this report cover the marketing season or crop year or years and should not be confused with cash receipts from these crops for a single calendar year. The season average price for each State is applied to utilized production to compute value of production. The average price shown for the United States is obtained by dividing the U. S. value of production by the quantity utilized.

FRUITS (NONCITRUS): MARKETING SEASONS FOR SPECIFIED CROPS

Apples	: All South Atlantic States, Kentucky, Tennessee, Indiana, Illinois, Missouri, Arkansas, New Mexico, and California, June 1 to May 31; all other States, July 1 to June 30, except Washington and Oregon where the bulk of the crop is marketed August 1 to July 31.
Apricots	: <u>Fresh fruit</u> --May 25 to August 20. <u>Canning</u> --June 15 to August 15. <u>Dried</u> --California, June 20 to August 20.
Avocados	: California--November 1 to November 30, (Following year). Florida--June 20 to March 1.
Cherries	: <u>Fresh fruit</u> --sweet varieties, May 1 to August 15; tart varieties, June 15 to August 20.
Cranberries	: September 5 to December 20.
Dates	: August 15 to March 15.
Figs	: <u>Fresh fruit</u> --June 5 to October 30. <u>Canning</u> --August 1 to October 15. <u>Dried</u> --California, June 20 to October 31.
Grapes	: <u>Fresh fruit</u> --California, May 25 to April 30; Arizona, June 5 to July 15; all other States, July 10 to October 31. <u>Crushed for juice, wine, and brandy</u> --August 1 to December 15. <u>Dried for raisins</u> --California, September 1 to May 30.
Nectarines	: California, June 10 to August 31.
Olives	: September 25 to March 15.
Peaches	: <u>Fresh fruit</u> --Georgia and South Carolina, May 20 to August 31; other South Atlantic States, South Central States, and California, June 1 to September 30; New England States, New York, Michigan, and Idaho, August 1 to September 30; all other States, July 1 to September 30. <u>Canning</u> --California, July 1 to September 10. <u>Dried</u> --California, August 1 to October 10.
Pears	: <u>Fresh fruit</u> --California, July 1 to April 30; Washington and Oregon, August 10 to May 31; other States, July 1 to December 15. <u>Canning and dried</u> --California, Washington, and Oregon, August 1 to November 30.
Persimmons	: September 25 to January 10.
Pomegranates	: September 15 to November 10.
Plums	: <u>Fresh fruit</u> --May 25 to September 30. <u>Canning</u> --June 1 to September 30.
Prunes	: <u>Dried</u> --August 15 to April 15.
Prunes and plums	: <u>Fresh fruit and canning</u> --August 10 to October 20.

TREE NUTS

Almonds	: August 5 to November 15.
Filberts	: October 1 to September 30.
Macadamia Nuts	: January 1 to December 31. (Peak harvest August to January).
Pecans	: September 30 to March 15.
Walnuts	: September 15 to December 30.
